Drupal experience

Author and maintainer of many contributed modules on Drupal.org, with both D6, D7 and **D8** versions. See https://www.drupal.org/u/lolandese. They report to be installed on 25.000+ websites. Using Drupal on full-time bases for ten years now. In that time span the following experience was acquired:

·   Profound knowledge of most mainstream modules (top 100), specialized knowledge of the Drupal modules Views, Commerce, Rules, Domain, Entity Reference, Feeds, Features (including building Installation Profiles).
·   Knowledge of most of the Drupal 7 API, including big part of the new Drupal 8 API. This includes also the template system to perform custom theming and desired rendering changes.
·   Written and writing own modules and patches, extending or overriding behavior of core or contributed modules and themes. This both for the Open Source community as mentioned above, as custom made for client projects.
·   Knowledge of most of the techniques integrated in Drupal like PHP (OO), Twig, jQuery, RegEx, JSON, SCSS, CSS3.
·   Portfolio mainly consisting of multilingual business sites, occasionally including Arabic (RTL). Also done eCommerce, Digital Publishing, Media Handling and data migration projects. Most of the websites I made in my webshop period (2010-2013) have deliberately closed (lack of time). Some can still be seen through web.archive.org (see http://www.martin.postma.website/work.html#top for the links).
·   Already fulfilled temporary development projects as Drupal Lead Developer internationally working within a team both on-site as remote.

Related knowledge

LAMP, GIT, UNIX, GIMP, UX.
